

English class 1: Summary of information from my partners

In the last English class, I had a conversation with two of my classmates: Mariana and Kaltoum. Mariana is currently looking for an interesting job. At the moment, she works as an accountant in Nancy but she doesn't like it. In the past, she worked in a shipping company in Canada. In the future, when she graduates from IAE business school, she will start her own business in accounting. Mariana does not use English at work but she knows it quite well thanks to her experience in Canada. All the suppliers came from the US, so she used to practice every day. Kaltoum works near Metz at Amazon, a company known worldwide as a computer engineer. She estimates that she uses her English skills here 50% of the time, mainly to communicate with other managers from foreign countries. In her previous work in Luxembourg, she also used English quite often. Her language level is high because she practices every day at work. Her goal is to speak English as a native to become a project manager and have missions on a global scale. Mariana speaks six languages: French, Russian, Moldovan, Romanian, English and Spanish. She has no difficulty communicating during her travels and of course, she uses English during her holidays.
